

TESTIMONIAL FROM RACHEL BRANSON, EDITOR OF WELLBEING MAGAZINE

After a miscarriage and 3 years of trying for a baby I decided to investigate some alternative health ideas as doctors and consultants were unable to give me any suggestions other than the IVF route.

Following acupuncture I knew that my liver function was weak and having seen Fiona previously for **Colon Hydrotherapy**, to improve my digestion, I decided to try the **Liver Cleanse** Fiona offers, as I knew optimal liver function was important for pregnancy.

After the treatment I felt very good and two weeks later had a period which was very different to previous ones, with none of the usual uncomfortable symptoms. By the time my next period was due I discovered to my delight that I was pregnant. I am now 4 months pregnant, have had a healthy scan and everything is going according to plan.

I want to thank you from the bottom of my heart Fiona and will be passing on your details to anyone who is having the same kind of difficulties. I will also be back again to see you after the baby is born as my digestion has also been greatly improved since both treatments.
